

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method of adjusting access rights of a caller, ~~for a requester of information, at least one selection criterion,~~ comprising:
 - receiving ~~a~~ an interaction request ~~for information~~ from the ~~requester~~ caller at an interaction manager;
 - retrieving selection criteria relating to the caller;
 - determining access rights of the caller;
 - determining if a token is associated with the ~~requester~~ caller; and
 - ~~if a token is associated with the requester, adjusting the~~ at least one of the information selection criterion criteria usable to identify information corresponding to the requester based on the token to control access to the information ~~a callee~~.
2. (Currently Amended) The method of claim 1, further comprising providing the caller with access to the callee based on the selection criteria ~~the identified information to the requester~~.
3. (Currently Amended) The method of claim 2, wherein the interaction request includes providing the identified information ~~includes providing a request for interaction information to the requester~~ interaction manager.
4. (Currently Amended) The method of claim 3, wherein the interaction request includes at least one of a caller identity, a caller's communication device, and a callers mode of communication ~~information relates to potential interaction with an issuer of the token~~.
5. (Original) The method of claim 3, wherein the interaction information includes at least one of visibility information, accessibility information, and continuity information.

6. (Original) The method of claim 5, wherein the accessibility information includes at least one hypertext link associated with an issuer of the token.

7. (Currently Amended) The method of claim 5, wherein the continuity information relates to past interactions between the ~~requester~~caller and an issuer of the token.

8. (Currently Amended) The method of claim 5, further comprising presenting the interaction information to the ~~requester~~caller as an interaction space.

9. (Currently Amended) The method of claim 8, further comprising displaying the interaction space to the ~~requester~~caller on a web-enabled device.

10. (Currently Amended) The method of claim 1, wherein determining if a token is associated with the ~~requester~~caller comprises:

obtaining a token associated with the ~~requester~~caller from a data source if the token exists.

11. (Original) The method of claim 10, further comprising obtaining an expiration date of the token.

12. (Currently Amended) The method of claim 10, wherein adjusting the at least one ~~information-selection~~ ~~criterion~~criteria comprises:

determining if the expiration date has occurred; and

adjusting the at least one selection ~~criterion~~criteria only if the expiration has not occurred.

13. (Currently Amended) The method of claim 10, wherein obtaining the token associated with a ~~requester~~caller comprises reading the token from a card.

14. (Original) The method of claim 13, wherein reading the token from a card comprises reading the token using a card reader.

15. (Currently Amended) A system that adjusts access rights of, for a requester caller of information for access to a callee, at least one selection criterion, comprising:

an input interface that receives an interaction request; and

a controller that identifies selection criteria associated with at least one of the requester caller and an information provider, and identifies a token associated with the requester caller and adjusts ~~the~~ at least one ~~information of the selection criterion criteria~~ usable to identify information corresponding to the requester based on the identified token to control access to the information callee.

16. (Currently Amended) The system of claim 15, further comprising an output interface that provides ~~the identified~~ identifying information to the requester caller.

17. (Currently Amended) The system of claim 16, wherein the identified information includes interaction information ~~for~~ related to the requester caller.

18. (Original) The system of claim 17, wherein the interaction information relates to potential interaction with an issuer of the token.

19. (Original) The system of claim 17, wherein the interaction information includes at least one of visibility information, accessibility information, and continuity information.

20. (Original) The system of claim 19, wherein the accessibility information includes at least one hypertext link associated with an issuer of the token.

21. (Currently Amended) The system of claim 19, wherein the continuity information relates to past interactions between the requester caller and an issuer of the token.

22. (Currently Amended) The system of claim 19, wherein the output interface presents the interaction information to the requester caller as an interaction space.

23. (Currently Amended) The system of claim 22, wherein the output interface displays the interaction space to the requester caller on a web-enabled device.

24. (Original) The system of claim 15, wherein the controller obtains an expiration date of the token.

25. (Currently Amended) The system of claim 24, wherein the controller adjusts ~~the~~ at least one ~~information of the~~ selection ~~criterion~~ criteria by determining if the expiration date has occurred and adjusts the at least one selection criterion only if the expiration has not occurred.

26. (Currently Amended) The system of claim 15, wherein the input interface obtains a token associated with the ~~requester~~ caller from a data source if the token exists.

27. (Original) The system of claim 26, wherein the obtained token is read from a card.

28. (Original) The system of claim 27, wherein the input interface includes a card reader.
